

AIM:

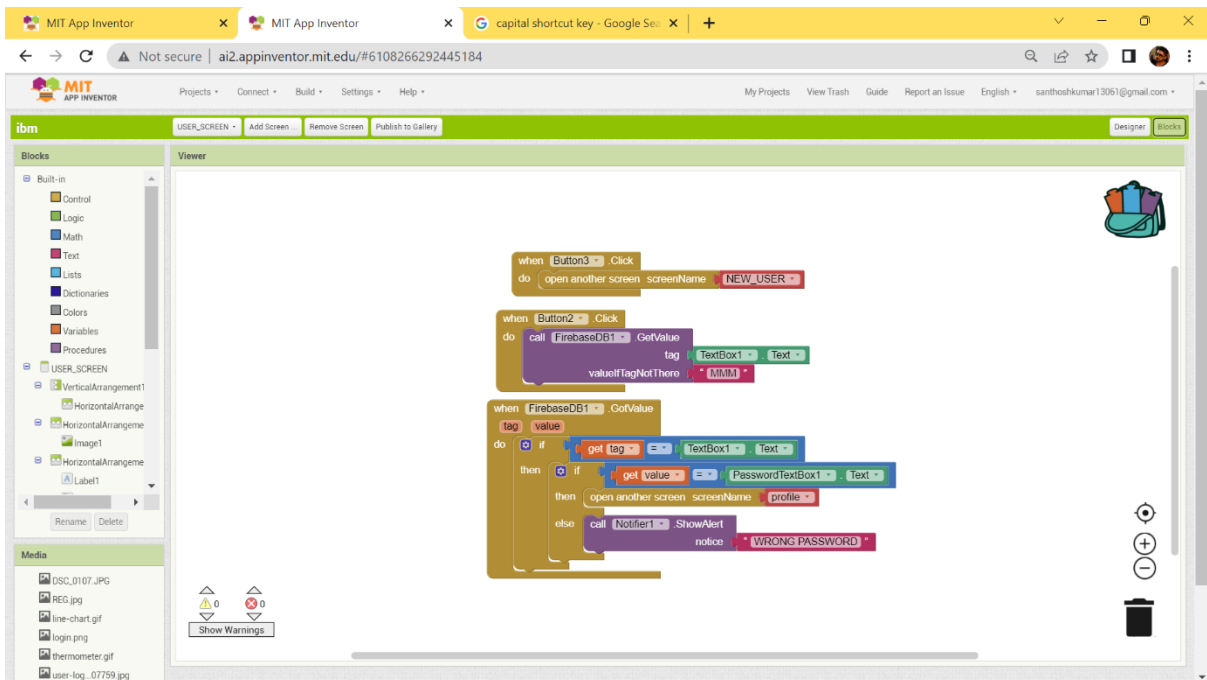

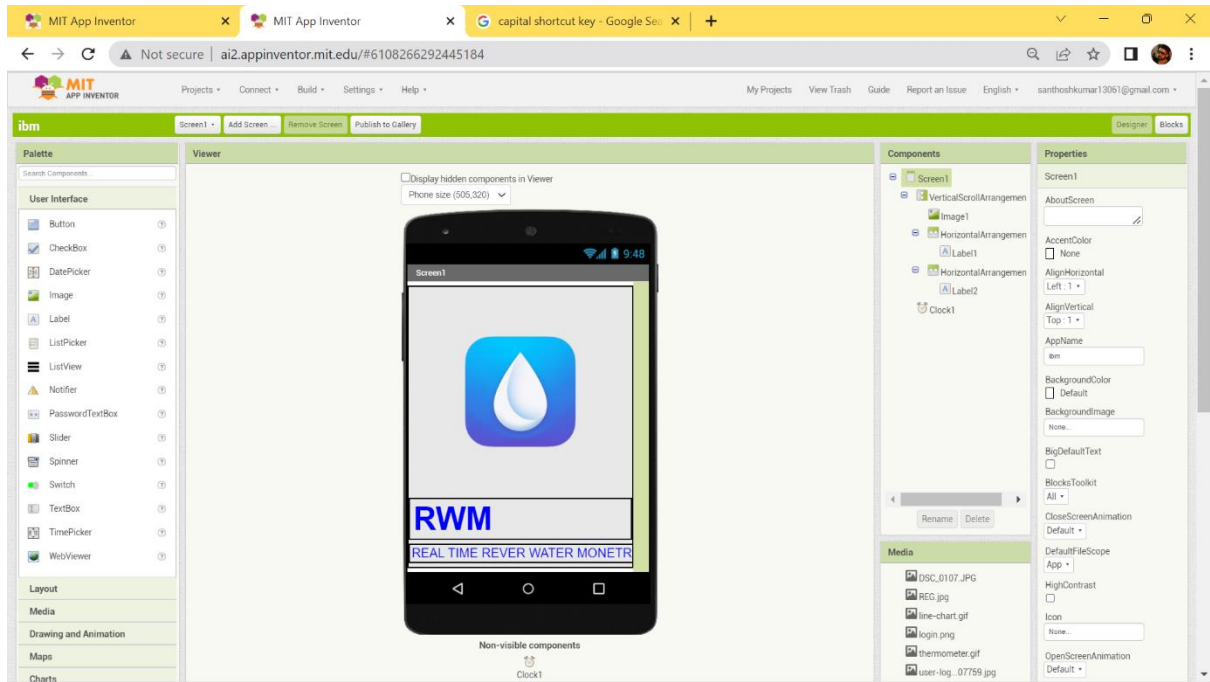

To create user interface and establish MIT APP INVERTER

REQUIREMENTS:

- MIT APP INVERTER
- FIRE BASE
- MOBILE MIT APP

ACTIVITIES:

- create a new project in **MIT** app inverter
- use the **USER INTERFACE** to build the front end
- create an account in fire base
- use the fire base in user interface to store the values
- use the blocks to give the command to the required interface
- use the web to connect the **Node Red** and **IOT** into the **MIT** app inverter
- use the connect option and click **AI** companion to connect the phone to the **Mit** app by the **QR code** shown in the screen
- once all the block are connected you can run the program and you see the out put in the mobile screen
- at end you can create an seperate app for mobile application
